

## Speed Safety Cameras

Speed kills and is a leading cause of road deaths in New York.

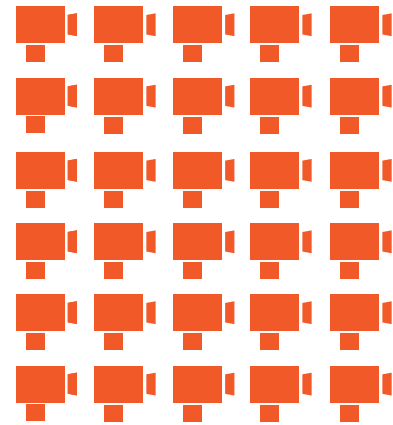

### Risk of pedestrian death

Speed safety cameras are effective.

For calendar year 2015 (NYC DOT).

School children are unprotected by speed safety cameras.

**93%**

OF NYC SCHOOLS  
AND STUDENTS  
DO NOT HAVE  
SPEED SAFETY  
CAMERAS

**7%**  
OF NYC  
SCHOOLS AND  
STUDENTS  
HAVE SPEED  
SAFETY  
CAMERAS

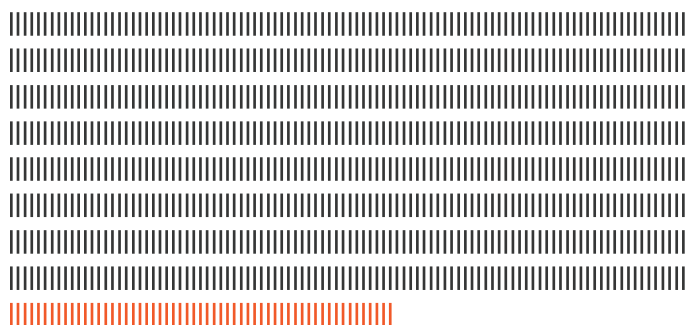

Cameras are limited to 140 school zones in NYC.

Speeding has dropped an average of **60%** in locations where speed safety cameras have been installed.

(NYC DOT)

A city-wide speed safety camera program would save lives and prevent serious injuries every year in NYC.

Over 50% of fatal crashes occur when speed safety cameras are currently prevented from operating, between 6 PM and 7 AM.

Under current law, speed safety cameras are only allowed to operate on school days up to one hour before/after school hours and thirty minutes before/after school activities.

### Speed safety cameras are fair.

\$50 Ticket

No points on driver's license

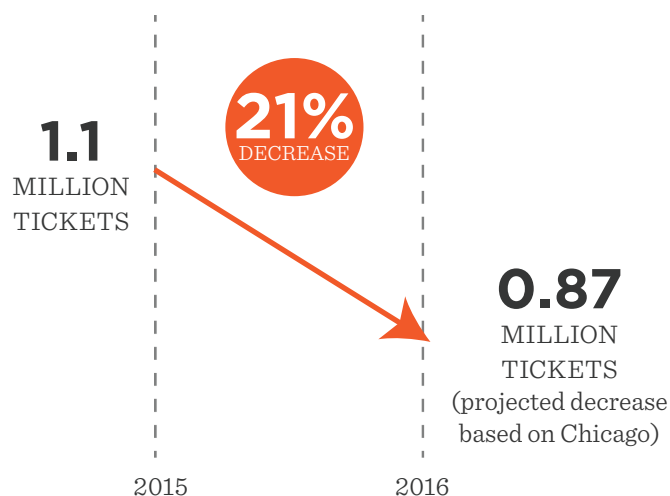

Cameras only capture speeding by at least 10 mph over speed limit

Cameras only monitor the speeding car – not the age, race, or gender of the driver

### Speed safety cameras are not for generating revenue.

Speed safety cameras cause drivers to speed less over time, meaning fewer tickets and less revenue.

Sign the petition for speed safety cameras at every school in New York City!
